LED FLEXIBLE TAPE

Welcome to the  **PowerLed®** range.

We design and manufacture unique LED lighting products of a high quality; bringing several advantages to lighting applications including energy savings, reduced maintenance and an overall reduction in the cost of ownership when compared with more traditional incandescent and halogen bulbs.

LED FLEXIBLE TAPE

PowerLed offer high quality LED Flexible Tape which has been developed to provide options in light, colour and intensity, as well as ingress protection, to make suitable for a wide array of installations. Built using precise LED binning and supplied in cuttable reels these tapes are a flexible and reliable solution to many lighting installations.

We provide a professional range of services including bespoke lighting design schemes, technical support by phone or online and a nationwide distributor network.

We make every effort to ensure the information provided is accurate however we can not be held responsible for errors. Specifications are subject to change without notice; please ensure you conduct testing to ensure the product is suitable for your intended application.

ECO 5M & 2M FLEXIBLE LED TAPE AND KITS

Compact LED tape with SMD LED technology.

ECO 2M Flexible LED Tape Kit comes with a PowerLed PCV1212 driver.

Our LED Flexible Tape offering has been developed to provide options in light colour and intensity, as well as ingress protection, to make suitable for a wide array of installations. Built using precise LED binning and supplied in cuttable reels, these tapes are a flexible and reliable solution to many lighting needs.

ACCENT LED FLEXIBLE TAPE

Multiple applications for commercial and residential environments and available in IP20 and IP65.

Precise LED binning enables consistent colour temperature from batch to batch.

Compact LED tape with SMD LED technology.

Epistar LEDs.

Our range of high power ACCENT LED flexible tapes have the same features as our low power 12Vdc models, but at 14.4W offer increased brightness levels.

Product Features

- Our IP65 option is encapsulated in a UV stable polyurethane coating, ensuring that it will not discolour over time as well as providing a scratch resistant finish, for a longer life
- Single RGB LED chip offers excellent colour mixing
- Epistar LEDs
- 10mm PCB for excellent heat management
- 50,000 hours working life
- Precise LED binning enables consistent colour temperature from batch to batch
- Easy installation
- Multiple applications for commercial and residential environments
- High grade 3M VHB ultra adhesive backing tape
- T.C point for accurate thermal management

CONTRACTOR LED FLEXIBLE TAPE

Single colour flexible tape available in cool, neutral and warm white.
Comes complete with 3M ultra adhesive backing for easy installation.

Product Features

- Energy saving
- IP20 & IP65 ratings available
- 2835 LED chips
- Available in Cool White, Warm White and Neutral White
- High reliability & efficiency
- 60 LEDs per metre
- Cutable every 100mm

HIGH CRI LED FLEXIBLE TAPE

PowerLed High CRI LED flexible solutions can be manufactured with a CRI rating up to 95, perfectly suited to retail and residential applications.

Powerled High CRI flexible led solutions are manufactured with a 24Vdc input voltage, 24Vdc will allow longer led lengths by reducing the current.

CRI is a measure of the LEDs ability to show object colours correctly and naturally.

Dual copper layer PCB for excellent thermal management.

Controlled binning for tone consistency.

Dimensions 20,000 x 10mm

Product Features

- Constant current design to ensure even colour distribution over longer lengths
- 24Vdc input voltage
- Maximum 20M powered from one end
- 60 LEDs per metre
- Multiple applications for commercial and residential environments
- Compatible with DALI/DMX/0-10V/Mains and all other dimming drivers

RGBW LED FLEXIBLE TAPE

Flexible design solutions can be mastered with the RGBW LED tape providing both RGB colour and white lighting in a single chip.

Dimensions 5000 x 12mm

Product Features

- Even LED RGB colour and white lighting
- Supplied with 3M tape as standard
- 60 LEDs per metre (RGB and white in single chip)
- IP65 rating
- 50,000 hours working life
- Multiple applications for commercial and residential environments
- Precise LED binning enables 100% consistent colour temperature from batch to batch
- Available in four white colour temperatures

RGB+W LED FLEXIBLE TAPE

Multiple design solutions can be achieved for commercial and residential environments with the RGB+W LED tape providing both RGB colour and four white temperature lighting.

Precise LED binning enables 100% consistent colour temperature from batch to batch.

Dual copper layer PCB for excellent thermal management.

72 LEDs per metre (36 x RGB and 36 white).

DIGITAL RGBD LED FLEXIBLE TAPE KITS

A new innovative range of digital RGB Flexible LED tape kits. Digital colour chasing is achieved by the control of 3 LEDs with 99 dynamic settings by means of the RGBD-99C Digital RF remote control.

Cascading options of up to 50M for either commercial or residential solutions.

IP20 supplied with VHB 3M tape as standard; VHB 3M adhesive backing tape can be ordered and supplied as a contractor fitted extra.

Available in IP20 & IP65.

Functions

Dynamic Mode	99 modes
Dynamic Speed Levels	10 levels
Static Colour	29 colours
Static Colour Brightness	10 Levels

Digital colour chasing is achieved by the control of 3 LEDs with 99 dynamic settings by means of the RGBD-99C Digital RF remote control.

Dimensions 85x 40 x 7mm

Product Features

- Dynamic colour chasing modes
- Cascading connectors
- High quality UV stable polyurethane coating enables non discolouration and is scratch resistant for longer life
- High grade thick 3M adhesive backing for easy installation
- 50,000 hours working life
- Multiple applications for commercial and residential environments
- Precise LED binning section enables 100% consistent colour temperature from batch to batch

TUNEABLE LED FLEXIBLE TAPE

Fitted with 3M adhesive tape.

Tone adjustment from 2800K - 6500K.

Dual copper layer PCB for excellent thermal management.

Use Tuneable LED Flexible Tape with CCT-RF Kit.

LED Pitch	16.67mm							

Dimensions 5000 x 10 x 2.3mm

- Product Features
- Tuneable White from 3000K ~ 6200K
 - High CRI ≥80
 - Supplied in 5M reels, cuttable every 50mm
 - 60 and 120 LEDs per metre
 - 60 LEDs at 12V & 120 LEDs at 24V
 - Fitted with 3M adhesive tape
 - 3 years warranty

INTELLIGENT TEMPERATURE CONTROLLED LED FLEXIBLE TAPE

Constant current design to ensure even colour distribution over longer lengths.

Available in 10M lengths.

Intelligent temperature control to prolong life of tape offering multiple applications for commercial and residential environments.

Width Dimensions 10,000 x 12mm

Product Features

- Constant current design to ensure even colour distribution over longer lengths
- Intelligent temperature control to prolong life of LED tape
- High temperature limitation to ensure safety
- Available in 10M lengths
- 60 LEDs per metre
- IP20 rating
- Multiple applications for commercial and residential environments
- Maximum powered from one end 10M

INTELLIGENT TEMPERATURE CONTROLLED LED FLEXIBLE TAPE

Lengths up to 10M powered from both ends; and a maximum of up to 5M if powered from one end.

Constant current design to ensure even colour distribution over longer lengths.

Intelligent temperature control to prolong life of tape offering multiple applications for commercial and residential environments.

RIGID LED PCB STRIP

Designed for commercial use, our RIGID PCB strips are fitted with 2835 or 5050 type LEDs. These IP20 (non weatherproof) rated 500mm long RIGID PCB strip are low profile and available in 6mm and 7mm widths. Designed to be mounted with or without additional extrusion, these RIGID PCB strips are a great solution for many applications. RIGID LED strip is widely used with acrylic light sheets.

- Available in 3000K and 6000K
- Single Colour 42 LEDs per 500mm
- RGB 36 LEDs per 500mm
- Cuttable every 71.4mm ~ 83.3mm on RGB
- 50K hours working life
- 110° beam angle
- Suitable for domestic, commercial, retail internal lighting applications and industrial applications

S-TYPE LED FLEXIBLE TAPE

Specialist S-Type Flexible LED tape has been designed with bespoke S-type double copper layered PCB to enable installation of LED where the PCB is required to bend around corners or to be installed inside illuminated letters.

- 50,000 hours working life
- Double copper layered PCB for added thermal management

LINEO LED FLEXIBLE TAPE

LINEO LED Tape is our range of project-based flexible tape; available in single, RGB, RGBW, dynamic white & digital diffused light colour options with horizontal & vertical bending capabilities.

LINEO ARC LED FLEXIBLE TAPE

LINEO offers completely diffused light without additional diffusion required and can be produced in single lengths of up to 10M (power from each end). This allows seamless light across larger distances.

12cm minimum bending diameter.

Seamless ultra high bright light with new design of connectors.

Available in both single colour and RGB, LINEO can be supplied with speciality connectors to achieve either IP67 or IP68 ratings allowing full submersion.

Product Features

- Designed for architectural and signage lighting
- Built to customer length and specification ready for installation
- Seamless ultra high bright light with new design of connectors
- Consistent high illumination along the entire length with no colour variation.
- Dimmable via DMX, DALI or 1-10V
- RGB colour changing
- Very flexible (3cm minimum bending diameter)
- UV and flame resistant PVC materials
- Domed profile for large view design lighting
- Flexible with 12cm minimum bending diameter
- Continuous lengths using our innovative seamless joins
- Easy to use with DIY accessories for joining, terminating, mounting and powering
- Available up to IP68 for special requirements
- Automated production, high reliability and long warranty
- ECO friendly and energy saving

LINEO NAUTILUS LED FLEXIBLE TAPE

The high IP protection NAUTILUS range offers an energy efficient solid linear light; making them ideally suited to accent, architectural and back lighting projects.

3cm minimum bending diameter (5cm on RGB).

LED lengths of up to 10M (single colour) are achievable by powering the LED at each end.

NAUTILUS LED is a high quality IP67 LED solution for commercial and external applications.

NAUTILUS is offered in bespoke project lengths.

LED POWER & CONTROL

PowerLed offer a range of LED power supplies, for both indoor and outdoor installations, to suit your requirements. LED drivers are power supplies, but with a difference; they offer some of the same features as a standard power supply, such as power factor correction, high efficiency, compact size and isolated or non-isolated design, but they have their own unique advantages too.

PowerLed's LED drivers have been specifically designed for a wide range of LED applications. All our drivers are CE approved as well as meeting stringent safety certification as detailed by UK European and International safety agencies, offering a warranty of up to 5 years* ensures that the PowerLed range of drivers are a safe and reliable choice. (*driver model dependent).

Product Features

RGBRF-4x5A

- RGB and RGB+W RF colour control interface
- 4 x 5A channels
- Store up to 6 Zones and 6 scenes on each zone
- 10 pre-set dynamic changing modes with pause function
- Able to mix millions of colour combinations
- For use with the RGBRF-RC1 remote control and/or the RGBRF-WM
- Wall mount colour wheel

- For use with the RGBRF-RC1 remote control and/or the RGBRF-WM
- Wall mount colour wheel
- Connects to WIFI for control from smart phone Apps on IOS and Android

RGBRF-RC1

- RF Remote control colour wheel for use with the RGBRF-4x5A and RGBWIFI-4x5A
- Colour wheel to instantly mix millions of colour combinations, which can then be stored in the handset.
- On/off and dimming functions
- 6 Zone control buttons
- Dynamic colour changing mode with pause function

Product Features

SCC206 & SCD107W

- Remote single colour LED dimming controllers
- Multiple levels of brightness adjustment with short cuts to fixed settings
- Ultra slim design
- Easy to pair dimmer unit with more controllers
- Auto memory recall function
- 15 metre transmission distance
- Wide range inputs
- Suitable for 12VDC and 24VDC LED Tape

RGB18

- Remote RGB LED dimming controllers
- RGB White can be used independently
- RGB static colour selection with 6 direct selection buttons
- Ultra slim design
- Easy to pair dimmer unit with more controllers
- Over temperature, overload and short circuit protections
- RGBW 4 channel output

- RGB-RP
- Designed for extending quantity of RGB LED tape lengths that can be controlled together
 - Provides channel outputs
 - Use with one RGB controller to control multiple connections
 - For use as repeater with RGB18 only
 - RGBW 4 channel output
 - Ultra slim design

- RGBW328W
- Remote RGB LED dimming controllers
 - Bluetooth compatible
 - Supported by iOS or Android device
 - Ultra slim design
 - Easy RGB colour and dynamic settings
 - Flicker free adjustable
 - 10 metre transmission distance

- PD2021 & PDMINI
- Ultra slim design
 - Over temperature, overload and short circuit protections
 - Auto recall function
 - Easy 'Plug and Play' technology
 - Wide 5~24VDC input range
 - Reverse polarity protection
 - Small compact design

- 3 in 1 dimming (1-10VDC, PWM or resistance)
- Quick fit AC and DC cable terminations
- LOW ESR output capacitors
- Thermally efficient design
- Short circuit, over load & over voltage protection

PCCX2E

- For use in luminaires of protection class 1
- Wire to operate as dual or single channel
- Soft start and low output current ripple
- SELV equivalent output voltages <60Vdc

SOLDERLESS CONNECTORS FOR LED TAPE

A wide variety of reliable, high-quality, solderless connectors to give you easy solutions for connecting LED flexible tapes, or terminating cut ends. Connecting your LED flexible tape is now quick and easy without the need to solder. To fit all widths of tape from 8mm~12mm available in tape to tape, tape to driver and butt joints.

The connectors are available as tail cable, joining connector or wire to wire connector for multiple configuration options.

Suitable for use with IP20 and IP65* 3528, 5050 & 2835. Suitable for single colour, RGB and RGB+W LED Tape (8mm, 10mm & 12mm).

*To maintain IP65 water proofing, adequate sealing should be applied around the connections.
